FEDERAL BUREAU OF INVESTIGATION
WASHINGTON, D. C. 20535

To: SAC, Los Angeles (7A-2195)

June 11, 1981

MF
From: Director, FBI

FBI FILE NO. 7-18251

Re: C ATKID;
MAJOR CASE #30;
KIDNAPPING

LAB. NO. 10526001 D/G LL VF
12

OO: Atlanta

Examination requested by: Los Angeles

Reference: Airtel dated May 4, 1981

Examination requested: Document - Authorship Identification - Fingerprint

Remarks:
XXXXXX

Specimens received: See Laboratory Report dated June 5, 1981,
for description of and disposition of specimens.

Remarks:

This will supplement the Laboratory Report of
June 5, 1981.

An authorship identification analysis of linguistic aspects of language style, vocabulary, spelling, punctuation, content, and syntax, was conducted on photocopies of Q90 and Q91. The results of this examination indicate that the author is probably a male, 10-15 years old. The symbols could not be identified, nor could any further profiling indicators be found.

7-18251-51 17 JUN 23 1981

Since identification by the linguistic method is not considered a positive means of identification, results of such examinations are provided for investigative assistance only, and are not intended for testimony. No report will be submitted for this examination.

Copies of Q90 and Q91 will be retained in the Technical Evaluation Unit for possible comparisons.

TO: DIRECTOR, FBI (ATTN: FBI Laboratory; Identification Division)
FROM: SAC, LOS ANGELES (7A-2195)(C-1)(P)
RE: ATKID;
MAJOR CASE #30
KIDNAPPING
OO: Atlanta

16526001-D

Enclosed for the FBI Laboratory is the original and two copies of an envelope postmarked Williamsport, Pennsylvania on 4/23/81, and a handwritten letter delivered inside the envelope. Enclosed for Atlanta is one copy each of the envelope and the letter. Also enclosed for Atlanta is the original and one copy of an FD-302 reflecting interview of [REDACTED] and rough notes from that interview.

For the information of the FBI Laboratory, enclosed items brought to the Long Beach, California, Resident Agency on 4/28/81 by [REDACTED]

[REDACTED] explained that the envelope is a pre-addressed and postage-paid envelope used by [REDACTED]

[REDACTED] to distribute literature to prospective customers. She stated that the envelope was provided to an unknown customer within the last year, and because it is printed in red ink, she knows

that the distribution was made from the New York Office of the company. She stated further that the New York Office maintains a list of all individuals who received such an envelope.

No suspects known to [redacted] regarding the enclosed material. *etc*

A letter contains threat to individual reading letter, and mentions captioned matter, while reversed side of envelope contains threat to President Ronald Reagan.

Examination of return address area on face of envelope appears to have previously listed return address which had been written in pencil and which was subsequently erased, and the name "Bobby Doe" added over the erased impressions.

On 4/29/81, Special Agent (SA) [redacted] U.S. Secret Service, Los Angeles, California, was advised of the enclosed letter, and on 4/30/81, Special Agent [redacted] Los Angeles, Secret Service, obtained a copy of the letter. *etc*

REQUEST OF THE BUREAU

The FBI Laboratory is requested to determine if enclosed items bear similarities to any previously known letters received for examination and to examine the return address area of the envelope in an effort to determine writing impressions which have been erased.

The Identification Division is requested to determine if any latent fingerprints are on the envelope or enclosed letter.

Additional leads being left to the discretion of Atlanta and the laboratory is requested to return the enclosed items upon completion of examination to Atlanta.

Date of transcription

[REDACTED] Georgia State Crime Laboratory, Atlanta, Georgia, furnished to Special Agent (SA) [REDACTED] a list of his preliminary findings concerning certain types of hairs and fibers that had been found common to the bodies and/or clothing of numerous murdered children and adults in the Atlanta, Georgia area. [REDACTED] also discussed the results of his comparisons of these hairs and fibers with samples obtained from the home of Wayne Bertram Williams, 1817 Penelope Road, Northwest, Atlanta, Georgia, and fiber samples and other debris taken from a white Chevrolet station wagon driven by Williams.

A chart prepared to reflect [REDACTED] findings, which is an attachment to this FD-302, contains the names of 26 murdered and one missing victims presently being investigated by the Task Force. The fiber findings as indicated on this chart were obtained from [REDACTED]. [REDACTED] has advised that these results are based for the most part on microscopic comparisons of fibrous debris from the clothing and/or bodies of various victims in these cases. Chemical tests, or tests other than a microscopic comparisons have not been conducted. (John Harold Porter is not presently included on the Task Force's list of victims, but appears to be related to these cases by fiber evidence and is included on the list as victim number 30.) [REDACTED] has also indicated that in some instances, these findings should be considered to be preliminary and additional microscopic work may be necessary. The association of many of these fibers, as well as other fibers, with Wayne Bertram Williams will be discussed later in this interview, and are not indicated on the attached chart. b7c

[REDACTED] advised that dog hair has been found on the clothing and/or bodies of nine (9) victims. These dog hairs include both guard hairs and fur hairs, with the guard hairs ranging in length from approximately one inch to three or four inches, and generally have a white base with a black tip. The fur hairs are almost all white in color. It was originally felt that these hairs were consistent with coming from a Siberian Husky, an Alaskan Malamute, a Norwegian Elkhound, a Keeshond or a black and silver German Shepherd. There was some brown coloration in some of the questioned hairs.

Investigation on 6/9/81 at Atlanta, Georgia File # AT 7A-1835 SF 36
by SA [REDACTED] Date dictated 6/11/81 File # AT 7A-1835 SF 69

This document contains neither recommendations nor conclusions of the FBI. It is the property of the FBI and is loaned to your agency; it and its contents are not to be distributed outside your agency.

The Williams family have a large, Shepherd-type dog that was tied in the back yard of their house at 1817 Penelope Road, during the search of the house on June 3, 1961. This dog does not appear to be a pure breed and the dog's coat has several shades of brown in it. Hair samples were obtained from the Williams dog and are presently being compared microscopically with the questioned dog hairs previously removed from the victim's clothing and/or bodies.

Although this dog has more brown in its coat than would be expected from an examination of the questioned hairs, it is certainly consistent with the general type of large, long-haired dog that was expected to be the source of the questioned hairs. A microscopical examination and comparison of these dog hairs has not yet been completed.

Light violet secondary acetate fibers were removed from the clothing and/or bodies of eighteen (18) of the victims. In addition, light violet acetate fibers were also recovered from John Harold Porter.

These acetate fibers have been found in large numbers on some victims. This would indicate the acetate fibers came from a fabric composed of spun staple yarns, which would be expected to shed fibers very easily.

During the search of the Williams' home, a large bedspread was present on the king size bed in the bedroom of Wayne R. Williams. This bedspread was composed of purple acetate yarns and light green cotton yarns and has a fringe of long, cotton yarns. The acetate fibers present in this bedspread exhibit the same microscopic characteristics as the light violet acetate fibers found on many of the victims and are consistent with originating from this bedspread. This bedspread also appears to be old and worn and would be expected to shed fibers easily because of its age, as well as its construction. [REDACTED] has not reported finding any cotton fibers on the victims or their clothing, which could be compared with the cotton fibers on the bedspread. Light color cotton fibers are very common and are usually of no value for significant comparison purposes. However, these light green, cotton fibers would have also been transferred to the victims' clothing if the clothing had come in contact with the bedspread in question, and, accordingly, the victims' clothing will be searched for cotton fibers of this type.

etc

222
DRAFT

[REDACTED] has also examined items of clothing obtained from the homes of 20 of the victims. These items of clothing were generally obtained after the victims' bodies were recovered. Light violet fibers were found on the clothing from the homes of ten of the victims. Of these ten victims where light violet, acetate fibers were found on their clothing from their homes, only five (5) of the victims had light violet fibers associated with them when their bodies were recovered.

[REDACTED] Darren Glass was reported missing on September 16, 1980 and has not yet been located.

[REDACTED] Michael McIntosh was recovered nude.

[REDACTED] Eddie Duncan and Joseph Bell were recovered wearing only shorts.

[REDACTED] Accordingly, in the above cases, the lack of the light violet fibers on the victims themselves can be accounted for by the small amount of clothing on the victims and that Glass has not been located.

[REDACTED] Coarse, yellowish-green, nylon fibers were recovered from the clothing and/or bodies of 13 of the victims. In addition, a coarse, yellowish-green nylon fiber was removed from John Harold Porter.

[REDACTED] These coarse, nylon fibers were compared microscopically with fibers present in the green, wall-to-wall carpet from the Williamses' home and were found to exhibit the same microscopic characteristics as present in the carpet fibers from the Williamses' home. A coarse, green, nylon fiber, similar to the fibers in the carpet from the Williamses' home, with the exception of having been subjected to considerable heat, was located in the hair from victim William Barrett. The green carpet in the bedroom of Wayne B. Williams has several charred or burnt areas.

[REDACTED] It should be noted that the morphology of these green carpet fibers is somewhat different than carpet fibers normally encountered. Attempts to identify the manufacturer of these green fibers through contacts with fiber producers have been negative to date. [REDACTED] advised that light yellow, nylon fibers, which also appear to be from a carpet, were recovered from five (5) of the victims. Many of these fibers also appear

223
[Signature]

to have been subjected to some type of heat or open flame. These nylon fibers exhibit the same microscopic characteristics as light yellow, nylon fibers that were found in the vacuum sweepings from the Chevrolet station wagon driven by Williams. Some of the light yellow, nylon fibers in the vacuum sweepings from the station wagon also had been subjected to some type of heat.

A number of light yellow, secondary, acetate fibers were recovered from victims Terrell and Baltazar. Light yellow, acetate fibers similar to those from Terrell and Baltazar were also recovered from clothing obtained at the homes of Baltazar, Joseph Bell and Eddie Lamar Duncan, after their bodies were recovered. An apparent source of these acetate fibers has not yet been identified.

Two dark green, nylon fibers were recovered from the shoes of William Barrett and exhibit the same microscopic characteristics as fibers present in the composition of the carpet in the white station wagon driven by Williams. These fibers recovered from the shoe of Barrett, could have originated from the station wagon driven by Williams.

[REDACTED] advised that light violet, acetate fibers, microscopically like those in the bedspread from Williams' home, have been found on the clothing of [REDACTED] who was missing for three (3) days, but was found alive. [REDACTED] has stated he does not know Williams, and the Georgia Bureau of Investigation (GBI) Laboratory has not been able to determine a possible source of the violet acetate fibers on [REDACTED] clothing. [REDACTED] who was drinking and allegedly "high" on drugs during his three-day absence, does not remember specifically his activities or travels on the days he were missing. Several yellow, acetate fibers like those found on clothing from several of the victims were also recovered from [REDACTED] clothing. A.J.C.

[REDACTED] also advised that the clothing from Cynthia Montgomery, a young, black female who was stabbed to death, has not been examined, and accordingly, has not been linked to the other murdered children by fiber evidence.

[REDACTED] at the conclusion of the interview, advised that there are still numerous microscopical examinations and comparisons to be conducted, as well as other types of examinations necessary to characterize the fibrous materials in these cases.

ATTENTION: LABORATORY DIVISION SPECIAL PROJECTS SECTION

ATKID; MAJOR CASE NUMBER 30; KIDNAPPING; OO: ATLANTA.

SUBJECT WAYNE WILLIAMS WAS ARRESTED JUNE 21, 1981, AND CHARGED WITH THE MURDER OF NATHANIEL CATER, THE MOST RECENT OF 28 VICTIMS IN THIS CASE. CATER'S BODY WAS FOUND FLOATING IN THE CHATTAHOOCHEE RIVER MAY 24, 1981, JUST DOWNSTREAM FROM THE SOUTH COBB DRIVE - CHATTAHOOCHEE RIVER BRIDGE. SUBJECT WAS OBSERVED THERE ON MAY 22, 1981, WHEN A LOUD SPLASH WAS HEARD IN THE WATER BELOW THE BRIDGE BY SURVEILLANCE OFFICERS.

ATLANTA REQUESTS LABORATORY DIVISION TO PREPARE A THREE-DIMENSIONAL MODEL OF THIS BRIDGE AND A TWO-DIMENSIONAL MAP OF THE AREA AROUND THIS BRIDGE FOR USE IN THE PROSECUTION OF SUBJECT.

ATLANTA FEELS THAT A THREE-DIMENSIONAL MODEL, TOGETHER WITH

A MAP, WOULD BE OF GREAT VALUE IN CLARIFYING THE EVENTS THAT TRANSPired ON AND AROUND THE BRIDGE ON MAY 22, 1981. SINCE NO ONE WITNESSED THE SUBJECT ACTUALLY THROWING CATER'S BODY OFF THE BRIDGE, IT IS IMPORTANT THAT THE EXACT LOCATIONS OF SURVEILLANCE OFFICERS AND AGENTS, SHOWING THE HEIGHT AND LENGTH OF THE BRIDGE AND THE TERRAIN OF THE SURROUNDING AREA, BE SHOWN, IN RELATION TO THE POSITION OF THE SUBJECT ON THE BRIDGE. WHILE A TWO-DIMENSIONAL MAP OF THE GENERAL AREA AROUND THE BRIDGE WILL BE SUFFICIENT TO SHOW THE ROUTE TAKEN BY THE SUBJECT WHILE DRIVING TO AND FROM THE AREA OF THE BRIDGE, A MODEL OF THE BRIDGE WOULD BE NECESSARY TO PROPERLY PRESENT THE PERTINENT DETAILS OF WHAT TRANSPired WHILE SUBJECT WAS ON THE BRIDGE.

FULTON COUNTY DISTRICT ATTORNEY LEWIS SLATON, WHO WILL PROSECUTE THIS CASE, SEES VALUE IN SUCH MODEL, AND HE FEELS THAT IT WOULD MOST LIKELY BE ADMISSABLE IN COURT.

ATLANTA HAS OBTAINED, FOR THE USE OF SPECIAL PROJECTS SECTION, PLANS OF THIS BRIDGE FROM THE GEORGIA DEPARTMENT OF TRANSPORTATION AND A TOPOGRAPHICAL MAP OF THAT AREA. AERIAL PHOTOGRAPHS ARE BEING TAKEN THIS DATE. IF DECISION

PHOTOGRAPHIC OPERATIONS AND FORENSIC EXAMINATION UNIT SUPPORT

b7j

PURPOSE:

To advise of support provided to the Atlanta Office in captioned case.

DETAILS:

On 6/3/81 and 6/5/81, personnel of the POFEU were dispatched to Atlanta to assist that division by taking crime scene photographs relative to captioned case. In addition to the long hours and voluminous photographs taken in this matter their expertise was also utilized for support in two other cases.

Attached is a synopsized log of work performed.

RECOMMENDATION:

None. For information.

FBI/DOJ

- 6/3-4 Left for Atlanta, Ga., via Eastern Airlines at 9:20pm, arrived Atlanta 11:00pm and went directly to the office. I photographed the suspect's vehicle, which totaled 30 photographs. As the crime scene search proceeded until 6:00 am 6/4/81, when the search was terminated. I then checked into a motel and returned to the office at 11:00am 6/4/81. I took an additional 15 photographs of the vehicle as the search was completed. I left the office at 7:30pm.
- 6/5-6 Arrived at office 8:00am and was requested by Atlanta to call SA [REDACTED] POFEU Unit Chief, and notify him that the subject's home was going to be searched and an additional photographer would be required. At this point SA [REDACTED] conversed with SA [REDACTED] and he then called Mr. Kelleher to explain the request for an additional photographer.
- At 1:00pm an agent assigned to Atlanta and I picked up photographer [REDACTED] at the Atlanta Airport and shortly thereafter returned to the office.
- Upon arriving we immediately went to the residence of the last victim and took 45 crime scene search photos until approximately 1:00am 6/6/81. *6/1C*
- At approximately 2:00am 6/6/81, we checked into the motel.
- We were instructed by SA [REDACTED] who originally requested us to come to Atlanta, to check in with the Atlanta switchboard every two hours and be ready to respond to the office in the event the suspect's house was to be searched on Saturday or Sunday.
- 6/6 Called Atlanta switchboard.
- 6/7 (Same as 6/6/81)
- 6/8 Photographer [REDACTED] took 15 photographs of the suspect's home via Bureau aircraft. [REDACTED] also took investigative aerial photos of two other sites totalling 30 photographs not related to this case, per request of Atlanta and with approval of SA [REDACTED]
- Photographer [REDACTED] took approximately 90 photos of another ATKID victim's residence during this time.
- 6/9 Regular day. Waited at office to be called to photo suspect's house. Was told at approximately 1:00pm there would be no search of suspect's residence and we could return headquarters. Notified FBIHQ and made plane reservations.

To : Mr. Otto

From : T. F. Kelleher Jr.

Subject : ATKID
MAJOR CASE #30
OO: ATLANTA

Date 6/1/81

[REDACTED] b7c
[REDACTED] b7c

PURPOSE: To discuss work presently being conducted in the Microscopic Analysis Unit (MAU) of the FBI Laboratory with fibrous evidence related to the ATKID investigation.

DETAILS: The MAU has in its possession four single fibers, each measuring approximately 1 to 2 centimeters in length, which is the evidence supplied to our Laboratory by the Georgia Bureau of Investigation (GBI) Laboratory. These single fibers are representative of fiber types found common to the clothing and/or bodies of more than one victim in these cases according to the GBI Laboratory and, therefore, the determination of the type of item that each of these fibers originated from could possibly be of considerable significance.

The MAU has identified and characterized these fibers and is presently initiating contacts with fiber manufacturers and companies that use fibers and/or yarns in their finished products in an attempt to obtain additional information. A trip to the Research Laboratories of the Du Pont Company in Wilmington, Delaware, was made by SA [REDACTED] of the MAU on 6/1/81, to discuss these matters with several of their chemists. Additional similar contacts are presently being considered.

b7c
L

Plans are also being made for [REDACTED] Assistant Section Chief of the Scientific Analysis Section, and SA [REDACTED] to attend a conference in Atlanta concerning the fibrous evidence in this case. This conference, scheduled for June 12 and June 13, is being organized by [REDACTED] GBI Laboratory in Atlanta, Georgia.

The following individuals, in addition to representatives of the FBI Laboratory, have been invited to attend:

[REDACTED]
[REDACTED]
1 - Mr. Otto

Date 6/25/81

From : J. LEE COLWELL

Subject : ATKID

On 6/25/81 at 11:15 a.m., Commissioner Lee Brown, Atlanta, Georgia, called and stated he was getting inundated with inquiries from the news media for comment in response to statements attributed to FBI Agent [REDACTED]. He stated that if those comments were accurate, he believed they were certainly inappropriate. I told Commissioner Brown that we had called Agent [REDACTED] yesterday and talked with him by phone and he advised the statements were taken out of context. I told him we were in the process of conducting an administrative inquiry and that Supervisor [REDACTED] was to be interviewed later today, 6/25/81, and a statement obtained from him. Appropriate additional inquiries will be made and then an analysis will be made for the purpose of making a determination as to whether or not Agent [REDACTED] acted improperly.

b7c 10
Commissioner Brown mentioned the fact that Agent [REDACTED] was quoted in a magazine article recently and this appeared to be a second incident where he may have spoken improperly. Commissioner Brown asked my views on what should be told the news representatives who were making inquiries of him.

I told Commissioner Brown that in a situation like this, we would advise the news representatives of our press policy and tell them that we had ordered an administrative inquiry. I pointed out to him the FBI policy was not to comment on the details of a pending case.

Commissioner Brown stated that he would respond to the news inquiries by saying that he had contacted FBI Headquarters and was told that FBI policy was not to comment on details of pending cases and that the FBI was conducting an administrative inquiry regarding the comments attributed to Special Agent [REDACTED]

23 JUL 7 1981

Commissioner Brown expressed appreciation for the opportunity to discuss this matter and stated he was certain that we could work things out in a manner that would be least disruptive to everyone's goal, that is reaching an early resolution of the tragic situation in Atlanta.

KIDNAPING
OO: ATLANTA

By teletype dated 7/17/81, Atlanta Division advises that a Fulton County, Georgia, Grand Jury returned a true bill charging Williams with the murders of Jimmy Ray Payne and Nathaniel Cater.

The Assistant Fulton County District Attorney stated that the indictment of Williams for the murder of Payne would allow the introduction of fiber evidence to the court on more than one victim.

Trial could begin within 30 days of the indictment if defense counsel requests speedy trial.

WAYNE B. WILLIAMS; ATKID; MC 30; KIDNAPING; OO: ATLANTA.

RE AT TEL TO HQ 7/12/81.

ON 7/17/81, A FULTON COUNTY, GA., GRAND JURY RETURNED A TRUE BILL CHARGING WAYNE BERTRAM WILLIAMS WITH TWO COUNTS OF MURDER. THE INDICTMENT CHARGED WILLIAMS WITH THE MURDERS OF JIMMY RAY PAYNE AND NATHANIEL CATER. ASSISTANT FULTON COUNTY DISTRICT ATTORNEY GORDON MILLER ADVISED THAT THE INDICTMENT OF WILLIAMS FOR THE MURDER OF PAYNE WAS LITIGATION STRATEGY IN THAT HE COULD INTRODUCE FIBER EVIDENCE TO THE COURT ON MORE THAN ONE VICTIM. MILLER ALSO INDICATED THAT PAYNE'S BODY WAS FOUND ON 4/27/81 IN THE CHATTahoochee RIVER ABOUT 100 YARDS FROM THE

5/32 of an inch; and the pile height about 10/32 of an inch. A cross section under a microscope appeared to be a flat tri-loboal shape.

A review of records and old carpet swatches for the pertinent period several years ago determined that the only carpeting which seemed to have enough similarity to possibly be identical with subject's carpet was an E&B carpet with a trade name of "Pageantry." This carpet was manufactured by E&B only during the period 3/20/69 to 1/4/72. It was made of 100% Wellman nylon yarn consisting of 57% round nylon and 43% trilobal nylon. However, E&B's records show it to be Wellman type 151B nylon, rather than 181B nylon. The swatch enclosed for the Laboratory is the "Pateantry" trade name and is further identified as No. 131 and has a color name of "Winter Moss" which appears very similar or identical with subject's carpet.

The Laboratory is requested to compare the "Pageantry" carpet with Williams carpet in an effort to determine whether they could be identical as to type of nylon fiber, etc. // Advise Atlanta and Dallas results of examination. //

b7c
For the further information of the Atlanta Division, [REDACTED] Evans and Black Carpets, Dalton, Georgia, would have access to records of dye standards used by E&B during the early 1970's.

If the Laboratory determines the Pageantry Carpet is identical to Williams carpet, Dallas can forward to Atlanta a list of several hundred retailers who handled carpet in the Southeast region for E&B as of 1975.

Re: ATKID;
MAJOR CASE #30
KIDNAPING

Specimens received

June 16, 1981

- Q116 Paper bag marked "A-1" containing numerous pieces of paper found on floor in "Room A Office"
- Q117 Paper bag marked "A-2" containing miscellaneous business papers, box of used and unused carbon paper, loose sheets of paper and typed sheets of paper "From Room A-Office"
- Q118 Envelope marked "A-3" containing one slapjack from "Room A Office"
- Q119 Envelope marked "A-4" containing index cards, piece of paper from room designated "Room A Office"
- Q120 Envelope marked "A-5" containing one steno pad, one sheet of paper from "Room A Office"
- Q121 Paper bag marked "C-1" containing manila folder which contains numerous papers, correspondence, photographs, personal interview evaluation forms forms and autobiographies from room designated "Room C"
- Q122 Paper bag marked "C-2" containing pieces of paper from room marked "Room C"

Result of examination:

The Q118 slapjack was examined for the presence of blood; however, none was found.

The handwriting on the Ghost Killer letters was compared with the purported handwriting of WAYNE BERTRAM WILLIAMS contained in the Q116, Q117 and Q119 through Q122 material.

The Laboratory has photocopies only of the Ghost Killer letters which limits the handwriting comparison with writing of WILLIAMS. For this reason, it could not be definitely determined whether WILLIAMS wrote these letters; however, characteristics were noted in the examination which indicate it is unlikely WILLIAMS wrote the Ghost Killer letters.

Selective photographs of writing appearing to be writing of WAYNE BERTRAM WILLIAMS are retained.

OATKID

Dear [REDACTED]

I want to congratulate you on the success of the technical fiber conference held at the Georgia Police Academy on June 12 and 13, 1981. It was an outstanding example of what can be accomplished when individuals from various agencies and interests put their heads together in a spirit of cooperation and support. I also want to again express appreciation for Dr. [REDACTED] and myself in being given the opportunity to participate.

During the conference, several attendees recommended that surface analyses be performed on the fibrous materials. I believe it was the consensus of opinion that microspectrophotometric analysis of dyes and trace elemental determination through neutron activation analysis could provide an indication of fiber manufacturer as well as other comparative data. It was also mentioned that a measurement of fiber density would be beneficial.

I want to reiterate the desire of the FBI Laboratory to make available to you our full resources to enhance, where possible, the fine work being performed in the Georgia State Crime Laboratory. I think the magnitude of this case and the vast volume of material to be examined require the application of extraordinary techniques and a supportive effort from the law enforcement agencies involved.

[DE-108] 7-18251-63

As we discussed at the conference, the FBI Laboratory has the capability to perform a microspectrophotometric examination of the textile fibers. This non-destructive test will not alter the original specimen in any way and has proven invaluable in its application. This instrument can be made available to [REDACTED] in the FBI Laboratory and we will be pleased to provide any assistance in its operation should he so desire. We also have the capability to perform Neutron Activation Analysis (NAA). In discussing this with the chief of the NAA unit, [REDACTED] has pointed out that the National Bureau of Standards (NBS) major in carbon

[REDACTED]

Washington, D.C., has an output capacity in excess of ten times the capacity of many other reactors. The higher flux available in the NES reactor permits the detection of elements at significantly lower levels as which might be anticipated in minute samples of textile fibers.

b7c

As you know, there are various techniques for determination of density, some of which are cumbersome and time-consuming. We are equipped to make specific determinations of density with a rapid and reliable technique. Again, we would be pleased to make this equipment available [REDACTED] in our Laboratory. It should be noted that this is a density determination technique and not simply a comparative density test.

I hope you will not hesitate to call on this Laboratory to discuss these analytical problems or any others which may arise. Be assured that our interest is not to supplant but merely support and enhance, where possible, the forensic examination services being performed in your laboratory.

Sincerely yours,

/S/

INFORMATIVE NOTE

Date 6/18/81

Re: ATKID

By attached teletype, the Atlanta Division advises that on 6/16/81 Wayne Bertram Williams followed by his father, Homer Williams, departed the Williams' residence in two separate vehicles and proceeded to a narrow gravel road. After turning onto the gravel road, Homer Williams blocked the thoroughfare allowing Wayne Bertram Williams to evade the surveillance. Williams was subsequently located and at this point, he returned to his residence.

On 6/16/81, Williams along with his attorney, Mary Welcome, appeared before U. S. District Court Judge Orinda Evans. Evidence was presented in an attempt to obtain a restraining order against law enforcement. Judge Evans took the matter under advisement and has not yet reached any decision.

THE RESULTS OF ALL CONTACTS SHOULD BE FURNISHED
EXPEDITIOUSLY TO ATLANTA AND THE LABORATORY.

DALLAS AFTER RECEIPT OF CARPET SAMPLE FROM ATLANTA
SHOULD DISPLAY SAMPLE AND OBTAIN REQUESTED INFORMATION FROM
E AND B CARPET MILLS, DALLAS, TEXAS. ██████████ HAS
ADVISED THE LABORATORY THAT E AND B CARPET MILLS SPINS CARPET
YARN AND USES THIS YARN IN THEIR OWN CARPET MANUFACTURING
OPERATION.

ALBANY AFTER RECEIPT OF CARPET SAMPLES FROM ATLANTA
WILL DISPLAY SAMPLE TO PERSONNEL AT MOHASCO CORPORATION,
AMSTERDAM, NEW YORK. ██████████ HAS ADVISED THE
LABORATORY THAT MOHASCO CORPORATION ALSO MANUFACTURES CARPET
FROM YARN THAT THEY SPIN.

SAVANNAH SHALL SET FORTH LEADS CONCERNING CARPET
MANUFACTURERS USING WELLMAN FIBER IN YARNS PRODUCED BY
RIVERSIDE MILLS. IF LEADS ARE OUTSIDE THE ATLANTA AREA,

HOME OF WILLIAMS. FBI LABORATORY IS ATTEMPTING TO DETERMINE
20 DEGREE OF UNIQUENESS OF THIS CARPET BY DETERMINING THE MANU-
18 FACTURER AND HOW MUCH OF THIS TYPE CARPET WAS MANUFACTURED AND
HOW MUCH WAS SOLD IN THE ATLANTA AREA.

16 IT HAS BEEN DETERMINED THAT THE FIBERS IN WILLIAMS' CARPET
WERE MANUFACTURED BY THE WELLMAN CORPORATION. THE FIBERS ARE
14 TYPE 181B NYLON STAPLE AND WERE MANUFACTURED BY WELLMAN FROM
1967 TO 1974. THESE FIBERS WOULD HAVE BEEN SOLD TO COMPANIES
12 WHICH PRODUCE CARPET YARN AND WHICH, IN THE CASE OF WILLIAMS'
CARPET, WOULD HAVE PRODUCED SINGLE-PLY YARNS.

10 WELLMAN HAS PROVIDED THE FBI WITH A LIST OF ALL CUSTOMERS
WHO PRODUCED YARNS WITH TYPE 181B NYLON FIBERS AND THESE CUS-
8 TOMERS HAVE BEEN CONTACTED.

6 COLUMBIA HAS ADVISED THAT PALMETTO SPINNING, LAURENS,
SOUTH CAROLINA, WHO PURCHASED WELLMAN FIBER IN 1970 THROUGH
1972, SOLD CARPET YARN TO THE FOLLOWING COMPANIES IN THE YEARS
4 INDICATED: 1. O. N. JONAS, KLEMING STREET, DALTON, GEORGIA,
1970, 1971; 2. DORSETT CARPET MILLS, DALTON, GEORGIA, 1971,
2 TELEPHONE 404-695-9411; 3. HAMPTON MILLS, ELLIJAY, GEORGIA.

INFOR

VE NOTE

Date July 13, 1981

WAYNE BERTRAM WILLIAMS;
Re: ATKID;

Attached Atlanta teletype advises that the following investigative activities are being conducted by FBI with certain aspects being requested by Task Force and Fulton County District Attorney's Office.

Williams may have utilized Greyhound package delivery system for shipment of potential evidence out of Atlanta between 5/22 - 6/21/81. Cleveland Division attempting to verify this through Greyhound.

Williams identified from photo spread by [REDACTED] as being driver of car entered by Lubie Geter. Investigation continuing.

Wellman, Inc., has been identified as manufacturer of fibers from carpet in bedroom of Williams' residence. Investigation continuing concerning other carpet samples.

FBI Laboratory Special Projects Unit is constructing scale model of James Jackson Parkway Bridge and surrounding area. This is half completed.

Investigation continuing in attempt to locate items belonging to Williams or victims and banks being surveyed in attempt to locate any safe deposit box that can be connected to Williams.

A new grand jury has been impaneled and will sit for 60 days. Deputy Chief, Atlanta Police Department, expects Williams to be indicted within 30 days.

- [REDACTED] 67C
- 1 - Mr. Mullen
 - 1 - Mr. Steel
 - 1 - Mr. Monroe

CONTINUED - OVER

276

15

Investigation continuing with the Emergency Medical Technicians in Atlanta area in order to determine if any are knowledgeable of Williams and whether he had access to their drugs.

Investigation into death of Latonya Wilson developed [REDACTED] as possible suspect. Investigation continuing in attempt to confirm existing evidence. *b7c*

Fifteen Agents and 19 clerical personnel continue to be assigned to the ATKID Special.

Photo display and interview of relatives and associates of Williams is almost complete.

ACCOUNTING OFFICE.

67C [REDACTED] WAS SHOWN A PHOTO SPREAD CONTAINING A PICTURE OF WAYNE BERTHIA WILLIAMS AND PICKED WILLIAMS' PHOTO AS THE INDIVIDUAL IN WHOSE CAR LUBIE GETER ENTERED AT THE STEWART LAKEWOOD SHOPPING CENTER. OTHER INDIVIDUALS WHO COULD POSSIBLY CORROBORATE THIS INFORMATION HAVE BEEN CONTACTED AND THEIR STATEMENTS APPEAR TO BE CREDIBLE. FOLLOW-UP INVESTIGATION IS BEING PURSUED.

INVESTIGATION HAS DETERMINED THAT WELLMAN, INC., IS THE MANUFACTURER OF FIBERS USED IN THE CONSTRUCTION OF CARPET FROM THE BEDROOM OF WILLIAMS. INQUIRIES IN THE NORTH GEORGIA AREA AND IN OTHER DIVISIONS HAS DETERMINED THAT WELLMAN 1013 NYLON STAPLE FIBERS WERE USED DURING 1970 - 1974. INVESTIGATION IS CONTINUING AS VARIOUS TESTS ARE BEING CONDUCTED ON CARPET SAMPLES TAKEN FROM WILLIAMS' HOME IN AN EFFORT TO DETERMINE THE MANUFACTURER.

AT THE REQUEST OF ASSISTANT FULTON DA GORDON MILLER, THE FBI LABORATORY SPECIAL PROJECTS UNIT IS IN THE PROCESS OF CONSTRUCTING A SCALE MODEL OF THE JAMES JACKSON PARKWAY BRIDGE,

279

Rey

PAGE THREE ATKID

SURROUNDING AREAS AND THE CHATTahooCHEE RIVER. AS OF THIS DATE, IT WAS REPORTED THAT THE SCALE MODEL OF THE BRIDGE IS HALF COMPLETED.

ON 6/30/81, A MEETING HELD AT THE OFFICE OF THE U.S. ARMY CORPS OF ENGINEERS, ATLANTA, DISCLOSED THAT THE CORPS OF ENGINEERS HAD COMPLETED A PRELIMINARY STUDY OF EXPENSES NEEDED TO CONDUCT A SURVEY OF THE CHATTahooCHEE RIVER AT JAMES JACKSON PARKWAY IN AN EFFORT TO DUPLICATE CONDITIONS AS THEY EXISTED IN THE EARLY MORNING HOURS OF MAY 22, 1981 WHEN WILLIAMS WAS SIGHTED ON THE BRIDGE. IT WAS INDICATED THAT A BELOW WATER OBSTRUCTION SURVEY (SIDE SCAN SONAR) AND A FIVER BOTTOM PROFILE (FATHOMETER SURVEY) WAS NEEDED AND SHOULD BE CONTRACTED AT A COST OF ABOUT \$10,000. IT WAS ALSO RECOMMENDED THAT AERIAL PHOTOS BE TAKEN AT A COST OF \$1,000 THE FBI PLANE AND CAMERA EQUIPMENT WERE VOLUNTEERED FOR THIS PROJECT, HOWEVER, IT WAS DETERMINED THAT FBI EQUIPMENT WAS NOT ADEQUATE TO PERFORM THIS TASK. MR. MILLER STATED THAT HE WOULD TAKE THE ABOVE INFORMATION UNDER ADVISEMENT.

A VISUAL INVESTIGATIVE AID (VIA) CHART HAS BEEN PREPARED

280

ES

PAGE FOUR ATKID

BY THE FBI LAB SPECIAL PROJECTS UNIT REGARDING THE ACTIVITIES OF WILLIAMS ON 5/21 - 22/81. A COPY OF THIS CHART HAS BEEN GIVEN TO MR. MILLER.

A CHECK IS BEING CONDUCTED BY ATLANTA FBI OF THE BUS STATION LOCKER AND MINI-WARHOUSES IN THE ATLANTA AREA IN AN ATTEMPT TO LOCATE ANY ITEMS BELONGING TO WILLIAMS OR ANY OF THE VICTIMS.

VARIOUS LOCAL BANKS HAVE BEEN CONTACTED (CONSISTENT WITH THE FINANCIAL PRIVACY ACT) AND REQUESTED TO CONDUCT A SEARCH FOR ANY SAFETY DEPOSIT BOXES THAT CAN BE CONNECTED TO WILLIAMS OR HIS BUSINESS. THE SEARCH IS LIMITED TO THE DATES PRIOR TO WILLIAMS BEING ARRESTED BUT SUBSEQUENT TO CATER'S BODY BEING FOUND.

AT THE REQUEST OF DEPUTY CHIEF MORRIS PEDDING, ATLANTA PD TASK FORCE ON ABANDONED AND MISSING CHILDREN, AND IN AN EFFORT TO DETERMINE THE ORIGIN OF WILLIAMS' FINANCES, INVESTIGATION IS BEING CONDUCTED TO DETERMINE IF WILLIAMS HAS RECEIVED A GOVERNMENT GRANT FOR A SMALL BUSINESS.

PEDDING ALSO ADVISED THAT A NEW GRAND JURY HAD JUST BEEN IMPANNELED AND WOULD SIT FOR 60 DAYS. HE RELATED THAT HE EXPECTED

281
BB

PAGE FIVE ATMD

WILLIAMS TO BE INDICTED WITHIN THE NEXT 30 DAYS. HE FURTHER STATED THAT IF WILLIAMS' ATTORNEYS REQUESTED A SPEEDY TRIAL, IT WOULD START WITHIN 30 DAYS OF THE INDICTMENT.

EMERGENCY MEDICAL TECHNICIANS (EMT) IN THE ATLANTA METRO AREA ARE BEING INTERVIEWED WITH RESPECT TO THEIR KNOWLEDGE OF AN ASSOCIATION WITH WAYNE WILLIAMS WITH PARTICULAR EMPHASIS PLACED ON HIS ACCESS TO THEIR DRUGS. ANOTHER AREA THAT IS BEING PURSUED WITH THE EMTS IS THE IDENTITY OF ANY INDIVIDUAL IN THE MEDICAL COMMUNITY WITH WHOM WILLIAMS HAS ESTABLISHED A LONG TERM RELATIONSHIP.

[REDACTED] LATONYA

[REDACTED] WILSON [REDACTED]

b7c
b7d

[REDACTED] IS A POSSIBLE SUSPECT IN HER DEATH. INVESTIGATION TO CONFIRM THIS INFORMATION IS BEING CONDUCTED.

THERE ARE PRESENTLY 15 AGENTS ASSIGNED TO THE ATMD SPECIAL. THESE CONSIST OF 6 FULL TIME AGENTS AND 9 FIRST OFFICE AGENTS UNDER TRANSFER. THE 90 DAY TRANSFER PERIOD FOR THESE FIRST OFFICE AGENTS BEGAN ON 6/22/81 AND WILL END ON 9/20/81. IN ADDITION, THERE ARE 15 CLERICAL PERSONNEL ASSIGNED TO THE CASE OF WHICH

282

BB

PAGE SIX ATWID

2 (1 SECRETARY AND 1 ROTOR CLERK) ARE PERMANENTLY ASSIGNED TO THE ATLANTA DIVISION. OF THE REMAINING 17 ASSIGNED TO ISIS TO BRING THE COMPUTER UP TO DATE WITH THE INVESTIGATION, 4 ARE PRESENTLY ASSIGNED TO ATLANTA DIVISION, 1 IS FROM THE JACKSON DIVISION AND 12 ARE FROM FBIHQ.

THE DISPLAY OF PHOTOS ALONG WITH INTERVIEW OF RELATIVES AND ASSOCIATES OF WILLIAMS IS ALMOST COMPLETE.

10424053

Analysis of kidney for DMSO: (\approx 40 grams)

- 1) 25 g of kidney is homogenized with 25 ml. of water.
- 2) 10 g of homogenate, corresponding to 5.0 grams of kidney, is ultrafiltered through a semi-permeable membrane with the ultrafiltrate collected in a test tube. After \approx 3.0 ml is collected, 5.0 ml of distilled water is added to the homogenate & ultrafiltration is allowed to continue until \approx 8.0 ml. is collected.
- 3) The ultrafiltrate is extracted for DMSO based on a procedure published for serum urine. "Studies of the absorption, excretion & metabolism of dimethylsulfoxide in man." Journal of Pharmacology & Experimental Therapeutics; Vol. 155, No. 2; 309-317, 1967. Hucker, Miller, Hochberg, Brobyn, Riordan & Calenick
- 4) Isolation:
 - a) The ultrafiltrate is saturated with 5.0 grams of NaCl & extracted 2x-4x ml. of chloroform containing isomylalcohol (3%). The solvent is filtered through glass wool- Na_2SO_4 and $\ddot{\vee}$ to 0.5 ml using the vacuum flash evaporator, N_2 & a warm water bath.

5) Detection:

- a) Using a GLC-FPD packed with 15% Carbowax 20M (6 ft.) with temp. at 180, 150, 225 C, DMSO had a retention

etc

7/6/1981

10424053

time of approximately 4 minutes. The FPL is selective for sulfamethoxazole and no solvent peak occurs. MDL is 30 ng/3 μl injection or 5 μg/0.5 ml aliquot extracted. Assuming 50% recovery, 10 μg of DMSO in 5 grams of kidney or 2 μg/gram needed to be present in order to be detected. This is well below ($\times 10$) urinary MDL levels as stated by Huckle et al in therapeutic uses of DMSO. In enriched tissue homogenates, recovery was greater than 50%.

Subject : ATKID (7-18251)
MAJOR CASE #30
OO: ATLANTA

PURPOSE: To advise of the status of toxicological work in ATKID.

DETAILS: Complete toxicological examinations have been conducted on specimens from victims Timothy Hill, Larry Rogers and William Barrett. Tissues from Michael McIntosh and Nathaniel Cater were examined for dimethylsulfoxide. A general screening examination is being conducted on tissues from Nathaniel Cater, the victim for whose murder a suspect has been charged. This examination is restricted due to the poor quality of the submitted specimens. None of these examinations have indicated a drug, poison or other unnatural chemical substance.

While all logical courses have been pursued and test conducted were as thorough as possible, there remain many thousands of compounds which could have been used and still escape detection in these screening procedures. At this point the task becomes a matter of a random selection of one of these unique substances and conducting tests specific for that substance. The tests for each material would take hours to weeks. In the absence of specific leads, this would appear to be unreasonably inefficient. The Atlanta Office has been requested to review the background of the chief suspect in the case for names of any particular drugs or other chemicals with which he may be associated. No such substances have been developed to date.

RECOMMENDATION: That upon completion of the examinations on Cater's tissues, no further examinations should be conducted without specific leads developed through investigations ongoing in Atlanta. The tissues will be retained in the Laboratory for six months against the possibility of the need for additional tests.

July 7, 1981

TO:
SAC, Atlanta

RE: ATKID
MAJOR CASE #30;
KIDNAPING

REFERENCE:

EXAMINATION REQUESTED 6-9-81

SPECIMENS:

Atlanta

Six photographs, Q96 through Q101

The Q specimens are further described in a separate
Laboratory report.

Nineteen latent fingerprints and one latent impression,
which is either a fingerprint or a palm print, of value were
developed on five of the photographs. No latent prints of value
were developed on Q96.

7-18251-61

Four of the latent fingerprints, which were developed
on a photograph of [REDACTED] Q98, have been identified as
finger impressions of Wayne Bertram Williams, FBI #847900P9
22 JUL 14 1981

MAILED 6	1981
JUL	8
FBI	

The remaining latent prints are not the finger or
palm prints of Williams. These latent prints were compared,
insofar as possible, with the available prints of the victims in
this case, but no identification was effected.

The specimens are enclosed.

The above enclosed photographs were obtained from the residence of Wayne Bertram Williams, suspect in captioned matter, during search of Williams' residence on 6/3/81.

Referenced Atlanta letter of 6/5/81 submitted eleven (11) 8x10 glossy photographs, among other items, which had been recovered from the residence of victim Michael McIntosh.

REQUEST OF THE BUREAU

FBI LABORATORY

The FBI Laboratory is requested to examine the enclosed photographs and compare them with the photographs submitted to the Bureau via referenced letter. Enclosed photographs are to be examined for any photographic, development or water markings and any other markings that could identify and/or link enclosed photographs with the photographs that were submitted from the McIntosh residence.

LATENT FINGERPRINT SECTION:

The Latent Fingerprint Section is requested to examine the enclosed photographs for any latents of value. Any latents developed should be compared with the fingerprints of Williams and victims in captioned matter.

WITH FORMER ASSOCIATE [REDACTED] DESCRIBED CARPET SAMPLE AS SINGLE YARN, CRIMP SET FIBER. [REDACTED] STATED RIVERSIDE MILLS MANUFACTURED YARN FOR CARPET UTILIZING WELLMAN TYPE 181B NYLON FIBER.

[REDACTED] STATED SAMPLE WAS DOMESTIC CARPET AND RIVERSIDE MILLS PROVIDED YARN FOR AUTOMOBILE CARPET ALMOST EXCLUSIVELY UTILIZING WELLMAN TYPE 181 NYLON. [REDACTED] STATED, HOWEVER, THERE IS NO GUARANTEE THAT A CARPET MANUFACTURER WOULD NOT HAVE UTILIZED RIVERSIDE MILLS NYLON YARN FOR DOMESTIC CARPET.

[REDACTED] STATED THE CARPET SAMPLE REPRESENTED A VERY POPULAR FABRIC USED FOR BOTH DOMESTIC AND AUTOMOBILE PURPOSES. COLOR WAS ALSO VERY POPULAR. SAMPLE HAS TWO BACKINGS: PRIMARY, OF POLY-PROPYLENE, AND SECONDARY, OF JUTE. THIS SHOWS IT TO BE DOMESTIC CARPET BECAUSE AUTOMOBILE CARPET WOULD HAVE A RESIN INCLUDED IN BACKING TO ALLOW IT TO BE MOLDED TO DESIRED SHAPE IN AUTOMOBILES. *LTC*

[REDACTED] STATED THERE IS A 90 PERCENT CHANCE THAT RIVERSIDE MILLS DID NOT MANUFACTURE CARPET SAMPLE BECAUSE HE DOES NOT RECALL EVER PRODUCING CARPET YARN FROM 100 PERCENT WELLMAN TYPE 181B NYLON. NEARLY ALL OF THE YARN SPUN BY RIVERSIDE MILLS UTILIZING WELLMAN TYPE 181B NYLON WAS BLENDED WITH OTHER NYLON FROM OTHER SOURCES BECAUSE WELLMAN DID NOT SHIP ENOUGH FIBER. HOWEVER, [REDACTED] COULD

305

PAGE THREE SV 7A-968 UNCLAS

NOT MAKE THAT A 100 PERCENT GUARANTEE.

[REDACTED] HAS OVER 30 YEARS EXPERIENCE IN MANUFACTURE OF CARPET
YARNS AND CONSIDERS HIMSELF HIGHLY KNOWLEDGEABLE IN THE FIELD.

[REDACTED] STATED [REDACTED] WITH [REDACTED] WOULD BE MOST
KNOWLEDGEABLE REGARDING THE MARKETING OF WELLMAN PRODUCTS.

IN VIEW OF THE ABOVE, FURTHER LEADS REGARDING DISTRIBUTORS
OF RIVERSIDE MILLS, AS STATED IN REFERENCED SAVANNAH TELETYPE TO
BUREAU, BEING LEFT TO DISCRETION OF ATLANTA.

INFORMATIVE NOTE

Date July 15, 1981

Re: WAYNE BERTRAM WILLIAMS;
ATKID
KIDNAPING
OO: ATLANTA

By attached teletype the Atlanta Division advises that on 7/15/81 Fulton County Superior Court Judge McKenzie ruled against Williams in his request for bond.

Williams' attorney has filed nine motions in connection with grand jury proceedings.

It is further noted that the Fulton County Grand Jury sits on Tuesdays and Fridays of each week for a period of two months. Assistant Fulton County District Attorney intends to conclude proceedings against Williams by Tuesday, 7/21/81.

The Atlanta Division anticipates request for assistance from the Special Projects Unit concerning courtroom exhibits concerning the James - Jackson Parkway Bridge and Williams' residence.

WAYNE B. WILLIAMS, ATKID, MC 30; OO: ATLANTA.

RE CO TEL TO HQ 6/26/81.

G.A. FOR INFO BOSTON, YELLOWISH GREEN NYLON FIBERS WERE FOUND
ON THE BODIES AND/OR CLOTHING OF SEVERAL VICTIMS IN THE ATKID
KILLINGS. THESE FIBERS ARE LIKE FIBERS IN THE COMPOSITION OF A
GREEN NYLON CARPET LOCATED IN THE HOME OF WAYNE B. WILLIAMS,
RECENTLY ARRESTED FOR THE MURDER OF NATHANIEL CATER. DE-25
FBI LAB IS ATTEMPTING TO DETERMINE DEGREE OF UNIQUENESS OF THIS CARPET
BY DETERMINING HOW MUCH OF THIS TYPE OF CARPET WAS MANUFACTURED

PAGE TWO ATKID

AND HOW MUCH WAS SOLD IN THE ATLANTA AREA.

IT HAS BEEN DETERMINED THAT THE FIBERS IN WILLIAMS' CARPET WERE MANUFACTURED BY THE WELLMAN CORPORATION AT ITS PLANT IN JOHNSONVILLE, S.C. THEY ARE TYPE 181B NYLON STAPLE AND WERE MANUFACTURED BY WELLMAN FROM ABOUT 1967 - 1974.

PALMETTO MILLS, LAURENS, S.C., RUNS WELLMAN'S 181B NYLON AND HAVE PURCHASED THAT MATERIAL IN LARGE QUANTITIES THROUGHOUT PAST YEARS. THIS MATERIAL IS RECEIVED FROM WELLMAN AS A FIBER AND IS MADE INTO A YARN AND IS SUBSEQUENTLY SOLD TO CARPET MANUFACTURERS FOR PRODUCTION OF FINISHED PRODUCTS.

b7c [REDACTED] PALMETTO MILLS, LAURENS, S.C., WAS CONTACTED BY COLUMBIA FBI ON 6/26/81 AND PROVIDED A LIST OF MILLS THAT COULD HAVE PURCHASED TYPE 181B NYLON YARN FROM PALMETTO SPINNING. ACCORDING TO THE RECORDS OF PALMETTO MILLS, LUDLOW CARPET MILLS, DALTON, GA., COULD HAVE PURCHASED TYPE 181B NYLON YARN FROM PALMETTO SPINNING.

ACCORDING TO RECORDS AT THE CARPET AND RUG INSTITUTE, DALTON, GA., LUDLOW CARPET MILLS WAS PURCHASED BY WALTER CARPET MILLS ABOUT 3 - 4 YEARS AGO. WALTER CARPET MILLS IS NO LONGER

31

PAGE THREE ATKID

OPERATING A CARPET MILL IN DALTON. THE CORPORATE HEADQUARTERS
FOR THE LUDLOW CORPORATION IS IN NEEDHAM HEIGHTS, MASS.

BOSTON CONTACT REPRESENTATIVES OF THE LUDLOW CORPORATION
AND DETERMINE WHETHER THEY MAINTAIN RECORDS OF PURCHASES FOR
LUDLOW CARPET MILLS, DALTON, GA., FROM 1967 - 1974. IF
RECORDS ARE AVAILABLE, DETERMINE (A) THE TOTAL AMOUNT OF YARN
PURCHASED BY LUDLOW CARPET MILLS FROM PALMETTO MILLS FROM 1967 -
1974, INCLUDING LOT NUMBERS, IF AVAILABLE; (B) OBTAIN A LIST
OF ANY CUSTOMERS, WHOLESALE OR RETAIL, IN THE ATLANTA AREA
FOR LUDLOW CARPET MILLS DURING THE PERIOD 1967 - 1974 OR DURING
ANY PERIOD IN WHICH CARPET MADE OF WELLMAN 181B NYLON YARN WAS
SOLD IN THE ATLANTA AREA. SUTEL RESULTS.
